ALAMAZE

THE CHOOSING COMPANION BRIGADE DOSSIERS:

Mammoths. Standing around 18' at the shoulders, they can support a driver and 3 archers. A brigade is about 30 mammoths, with a crew of 120 warriors and 30 swatters, who assist in controlling the beasts (but have a short life expectancy). Mammoths are very tough, create an impressive platform for short range missile fire, are excellent in the charge, and under good handlers, useful in tearing down structures when assaulting a population center.

Mammoths are a potential Companion type to these kingdoms:

Dwarves, Cimmerians, Rangers, Ancient Ones, Druids, Warlock.

The Requirements to obtain a brigade of Mammoths:

Terrain: Plains Leadership: Marshal

On-hand Brigades: Elite brigade

Maximum per group: 3

Special: Cause Fear. Trample if enemy retreats: 2x losses in retreat phase if 2+ mammoth brigades.

Phoenix. Larger than a Black Dragon, Phoenix normally have a pack of about a dozen that forms a brigade. The have flight, nearly supernatural defense and healing. They are evasive in the missile phase but use a breath weapon of fire, they make a diving attack during the charge phase, and are otherwise rated good in most phases.

They may only be summoned inside the Fire of the Void volcano (area NN). Only one Phoenix brigade may be summoned per group per turn and only one Phoenix brigade is permitted in a group at all times (including when combining or transferring brigades among groups). Phoenix brigades have regenerative powers. A group that contains a Phoenix brigade may issue their special order #236 once per turn, group ID in Column A. This ability will heal up to 5% of that group's attrition. This order will not reduce the attrition to summoned troops that were not fed.

Phoenix are a potential Companion type to these kingdoms: Black Dragons, Red Dragons.

The Requirements to obtain a brigade of Phoenix:

Terrain: Fire of the Void only (NN)

Leadership: Marshal

On-hand Brigades: 3 brigades

Maximum per group: 1

Special: Flight. Heal attrition via order #236. Flight bonus vs. PC's. Very strong.

Saurus: These large reptilians, about 15' long to the tail, and stand 8' high at the shoulders, they can sprint short distances, and while they usually wield bladed weapons, they have a crushing bite with their 6" razor-sharp teeth. They are dangerous in the charge phase and exploiting openings in a PC's defense. Generally, there are about 200 Saurus in a brigade.

Saurus are a potential Companion type to these kingdoms:

Lizard Kingdom, Illusionist, Sorcerer.

The Requirements to obtain a brigade of Saurus:

Hill Giants: Between 8 and 12 feet tall, Hill Giants became prolific about a century ago, and are nearly non-discriminatory as to who they may fight for or against, they bolster weaker militaries and augment strong ones. Tough to kill and very goo attacking PC's, or in open melee. Usually about 70 Hill Giants to a brigade. They are the toughest of all Companion brigades.

Hill Giants are a potential Companion type to these kingdoms:

Cimmerians, Amazons, Sorcerer, Warlock, Druid, Pirates, Underworld, Atlantians.

The Requirements to obtain a brigade of Hill Giants:

Rohirrim: Skilled, quick, well-trained riders, they are among the best medium cavalry in Alamaze. A Rohirrim Squadron is generally about 600 riders, in leather and proficient with both bow and spear. They are a fine complement to most forces.

Rohirrim are a potential Companion type to these kingdoms:

Rangers, Warlock, Atlantians, Sacred Order

The Requirements to obtain a brigade of Rohirrim:

Terrain: Plains Leadership: General

On-hand Brigades: Veteran brigade

Maximum per group: 5

Special: A group with 2+ Rohirrim brigades may issue the Flanking tactic in plains or desert regardless of the kingdom having the Rider trait except against a Rider trait kingdom.

Wyvern: The loyal companions of dragons, wyvern have no breath weapon, but a wingspan of about 20' and a length of 25', long sharp and plentiful teeth crushing talons and a dangerous barbed tail. They can keep pace in flight with their dragon masters and are very useful

supplementing the dragons in combat. About 50 Wyvern comprise a brigade.

Trolls: The Troll Uprising did not long endure. Weak leadership led them to throw in mainly with

the usurper known as The Tyrant, but Troll tribes might follow many kingdoms. Among the most dangerous of Companions, they can turn a battle, especially against PC's.

Trolls are a potential Companion type to these kingdoms:

Tyrant, Necromancer, Sorcerer, Warlock

The Requirements to obtain a brigade of Trolls:

Wildlings: Numerous barbarian tribes, they are not unified and are generally open to joining with

whichever kingdom approaches them to become mercenaries. They are most plentiful in the north but may be found elsewhere as well. Some kingdoms may field armies of Wildlings – as many as 10 brigades. They are known for their reckless bravery, and are useful

supplemental troops once at the charge phase and beyond. Their weaponry is varied, including war hammers and axes. A whole tribe may join as one, generally meaning about 2000 Wildlings per brigade.

Wildlings are a potential Companion type to these kingdoms:

Cimmerian, Amazons, Dwarves, Tyrant, Pirates

The Requirements to obtain a brigade of Wildlings:

Apes: Only a few nature-oriented kingdoms can gain vast pacts of these large primates to follow

them and have the skill to communicate with them to facilitate effective combat. For near minimal upkeep, they can be an effective supporting force to kingdom brigades. They often carry large clubs but might just as often rend foes apart with their strong arms, or tear out throats with their fang-like teeth.

Scorpions: the Giant Scorpions from the desert sands grow to 15' long and about 6' high. Besides their killing claws, the venom in their tail is instant death to all but the most stalwart foes. They are sometimes trained to target figures in colorful or unusual garb

(leaders and wizards). While not easy to acquire, they may be worth the effort in the south.

Scorpions are a potential Companion type to these kingdoms:

Nomads, Warlock, Pirates

The Requirements to obtain a brigade of Scorpions:

numbers over the last century, attracted to the big flyers (dragons) but possibly also a couple kingdoms with affinity for this kind of creature. A group may contain up to 10 Great Bat brigades, which seem to number around 800 bats per brigade.

Zealots: The upheaval after the 2nd Cycle has produced many Zealots, disenchanted humans who

have turned to faith in a higher power to quell their misgivings about the 2^{nd} Cycle dynasties and the misfortunes that subsequently befell their families. These are loyal, if not necessarily well trained brigades, which can be attracted in numbers by those kingdoms with a clear understanding and doctrine of what lies beyond this world.
